REASONS FOR ALLOWANCE

1. Claims 1-8 are allowed. The following is an examiner's statement of reasons for allowance.
2. Regarding claim 1, prior art fails to disclose or fairly suggest a correction coefficient calculating method for X-ray CT systems, including the step of determining a first correction coefficient and a second correction coefficient, wherein calculating a final correction coefficient comprises computing the final correction coefficient from the first and second correction coefficients, wherein the first coefficient is calculated from a phantom having a first shape different than a second shape of a phantom used to calculate the second correction coefficient, in combination with all the limitations in the claim. Claims 2 and 5-8 are allowed by virtue of their dependency.
3. Regarding claims 3 and 4, prior art fails to disclose or fairly suggest a method or system, including fitting a first function to second projection information so as to produce third projection information, fitting a second function to third projection information values, the third projection information values provided as functions having as independent variables second projection information values that are sampled in relation to all views and each channel of an X-ray detector constituting the second projection information, and correcting projection information acquired from a subject, who is positioned in the scan field, using a correction function obtained as the second function, in combination with all the limitations in each respective claim.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Terminal Disclaimer

5. The terminal disclaimer filed on September 1, 2006, disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent No. 6,944,258 has been reviewed and is accepted. The terminal disclaimer has been recorded.
